

Great genes

New MS-60 portable helium leak detectors

are innovative and highly refined, with all the quality, features and serviceability of the **MS-40** plus

- standard 7 cfm direct drive foreline/roughing pump for faster cycle times
- **AZ³** for more accuracy
- sensitivity to 5×10^{-12} atm cc/sec
- password security
- Yttria-coated iridium filaments
- internal temperature compensated leak standard and external calibration for greater flexibility
- fully automatic operation, tuning and calibration

• Let's talk leak-test applications at **SEMICON West booths 8913 and 1748** or call 631-737-0900 or visit www.vacuuminst.com
