

Global Helium Shortages?

No Problem!

Recover up to 98% of your helium

VIC Helium Recovery and Recycling Systems

reduce operating costs associated with helium leak testing with recovery efficiencies up to 98%

- Unparalleled application experience
- Turnkey gas handling solutions
- Compressors that utilize oil-less piston seals
- ASME coded and certified gas storage vessels
- Continuous on-line helium concentration monitoring
- Real time diagnostics
- Worldwide service

Complete leak-test,
gas handling and helium
recovery solutions
on any scale
