

# The smartest leak-test combo

**New!**

## SmartCharge III + The Real Sniffer

VIC's SmartCharge III + MD-490S portable helium leak detector is a winning combination for industrial sniffing applications. SmartCharge III is a fully automatic evacuation and backfill station that prepares products for leak detection with the first cumulative leak site integration

feature in the industry.

This combo offers:

- Built-in gross leak-test eliminates tracer gas contamination
- 10 part-specific recipes
- Barcode scanner input
- Ethernet data logging
- Multilevel password protection
- Response time <0.5 seconds
- Sensitivity to  $10^{-8}$  Atm cc/sec
- Helium background suppression
- Dry, maintenance-free pump
- Built-in calibrated leak
- Automatic calibration traceable to NIST, with calibration certificate
- Optional remote display and vibrating probe
