**Air Leak Test Solution Offers Integration Capabilities with PLCs and HMIs**

**Dayton, Ohio, January 19** – Vacuum Instrument Corporation, a world leader in the leak detection industry has developed a low cost, air leak test solution that’s fully customizable and is easily integratable with a variety of PLCs and HMIs.

“VIC-Kit can be used with an array of industry recognized PLCs/HMIs and is a powerful solution for the systems integrator,” says Mike McKay, General Manager of V.I.C.’s Air Leak Test division, Dayton, Ohio.

Some key features of VIC-Kit include:

Pneumatic package

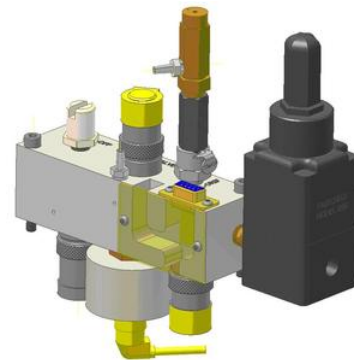

- Pressure increasing/decay measurement method
- Built in integrity test
- Built in calibrated orifice
- Precision Regulator
- Sensitivity based on application
- Multiple channels
- Allows close coupling to test part/connection
- Independent of test panel/enclosure

Software

- Complete control of leak test
- Automatic calibration with leak master
- Automatic compensation with zero leak

Host integration

- Seamless operation with host controls
- Mirror format of PLC / HMI program layout
- Data integrated with host operation
- 16 bit analog for maximum sensitivity
